

ЗАМЕТКА

***Cyrtophora citricola* (Aranei, Araneidae) New to the Montenegro Fauna [Паук-кругопряд, *Cyrtophora citricola* (Aranei, Araneidae), впервые отмечен в фауне Черногории].** — The orb-web spider *Cyrtophora citricola* (Forsskel, 1775) (Aranei, Araneidae) has a wide tropical and subtropical Old World distribution, with invasions to New World (Greater Antilles, Costa-Rica, Colombia). In East Mediterranean area, it has been recently reported from Croatia, Albania, and Turkey. During a short field trip, I found 2 ♀ of this species in Montenegro: Budva, 4.08.2013 (leg. K. Mikhailov and E. Temereva). Previously, 102 spider species were known from this country (Deltshev, 1999). This record adds a new species to the Montenegro spider fauna. — **K. G. Mikhailov** (Zoological Museum of the Moscow State University, Moscow, Russia).
