

EDITORIAL

The Ukrainian Journal of Physics continues to publish the Proceedings of the International Bogolyubov Kiev Conference “Modern Problems of Theoretical and Mathematical Physics” (Kiev, September 15–18, 2009).

The Conference gathered about 200 participants from Ukraine, Austria, Georgia, France, Israel, Moldova, Russia. The program of the Conference included the following topics: mathematical methods of theoretical physics, quantum field theory, statistical physics, kinetic theory, nuclear physics, and solid-state theory. More than 50 invited talks on these subjects were presented.

The first part of the Conference Proceedings was published in the 8- and 9-th issues of the Ukrainian Journal of Physics in 2009. This issue includes a new portion of papers presented as invited talks at the Conference. The papers were reviewed in the regular manner.
