

30th International Congress of Clinical Neurophysiology

We are happy to announce the 30th International Congress of Clinical Neurophysiology (ICCN2014) of the International Federation of Clinical Neurophysiology (IFCN).

The ICCN2014 will take place in Berlin from March 20-23, 2014 and will be organized in conjunction with the Annual Meeting of the German Society for Clinical Neurophysiology and Functional Imaging (DGKN) scheduled from March 19 -22, 2014.

Modern Clinical Neurophysiology is changing.

The ICCN2014 will represent the classical methods such as EMG, NCS, EEG and evoked potentials in scientific sessions and educational courses, as well as advanced clinical neurophysiology using event related brain potentials and fMRI, modern therapeutic or interventional approaches such as invasive and non invasive brain stimulation. It will also cover closely linked imaging methods such as ultrasound, especially high resolution ultrasound and MRI of muscle, nerve and brain. ICCN2014 shall also show how these methods are embedded in the clinical context studying neuromuscular disorders, epilepsy, sleep, pain, cognitive and central movement disorders, brain plasticity in stroke, neurodegeneration and neuroinflammation and others.

To share the event with a wide professional audience, we would like to announce the conference in one of your upcoming print issues and on the website

of your journal "Neurophysiology".

In return, we would be happy to cooperate with you on a mutually beneficial 'barter' basis and provide one of the following benefits to you:

- insert of your journal or other marketing display material in the delegate bags
- display of your journal or marketing material on our public-relations-table at the conference or in the conference hall in a session of your choice
- the publication of your advertisement in our program brochure
- place a link of your Publisher/journal on the conference homepage

We are certain that a mutual co-operation will be beneficial for both of us and bring an added value.

Please let me know your thoughts about our offer – I'm looking forward to your reply!

Kind regards,

Sebastian Leipelt
